

BUSINESS MODERNIZATION BRIEF

Summit Air Mechanical

📍 HVAC & mechanical services · Denver, CO

PREPARED EXCLUSIVELY FOR

Summit Air Mechanical

Confidential discussion document prepared for the owners.

DATE PREPARED

July 19, 2026

artifexlabs.tech

The opportunity in brief

A well-run business with a strong local reputation and clear, low-risk room to modernize how customers discover, evaluate, and book.

PRIMARY OPPORTUNITY

A modern, mobile-first experience with a clear path to act — so interest turns into booked business day or night.

WHAT'S WORKING

A trusted reputation and steady, repeat demand that most competitors would envy.

POTENTIAL IMPACT

Fewer missed inquiries after hours, less manual work at the front desk, and a more professional first impression.

RECOMMENDED FIRST CONVERSATION

A focused 30-minute discovery call to map the current customer journey and find the highest-return changes.

01

What's working well

An honest look at the foundations Summit Air Mechanical can build on.

Excellent reputation and strong word-of-mouth

Established, trusted local presence

Clear, well-structured service offering

Loyal repeat customer base

Where modernization would help most

Each observation pairs what we saw with its likely business consequence and a concrete direction forward.

01

No online booking path

PRIORITY

EVIDENCE

The website lists a phone number only; no scheduler is shown.

CONSEQUENCE

Customers who prefer to book online may leave after hours or choose a competitor.

DIRECTION

Add an online booking flow tied to the calendar, with availability shown up front.

02

Dated, slow mobile experience

EVIDENCE

The site is not mobile-optimized; text is small and slow to load.

CONSEQUENCE

Most local searches are on mobile — a poor experience undercuts a strong reputation.

DIRECTION

Rebuild on a fast, mobile-first foundation with clear calls to action.

From today's experience to an improved flow

The same customer, before and after — where friction lives now, and how the experience could feel instead.

🕒 TODAY

- 1 A prospective customer searches, finds the business, and must call during business hours to ask about availability before booking.
- 2 Staff field repeated calls for the same routine questions.
- 3 If the office is closed, the customer waits — or moves on.

✦ WITH MODERNIZATION

- 1 The same customer finds a modern, mobile-first site, sees availability immediately, and books in under two minutes.
- 2 Automated confirmations and reminders reduce no-shows with no manual work.
- 3 Staff focus on in-person service while the site handles routine scheduling around the clock.

04

A clear, staged way forward

RECOMMENDED ENGAGEMENT

Streamlined day-to-day operations

POTENTIAL COMPONENTS

Modern responsive site

Online booking

Automated reminders

Analytics

OPTIONAL SECONDARY OPPORTUNITY

A lightweight internal dashboard giving staff a single view of upcoming appointments and new requests.

INVESTMENT

Illustrative planning range — not a binding quote. Confirmed after a short discovery conversation.

NEXT STEP

Let's map the journey together.

A short, no-pressure discovery call to see exactly where modernization would help most — and what it would take to get there.
